

Definition Pro™ REAR PROJECTION SCREEN

Matte/Glossy

The Definition Pro Matte/Glossy is a 5mm thick rear projection screen that is dark grey in color and boasts some of the most outstanding characteristics of any rear projection screen on the market today.

This screen has a matte projection side and a glossy front which gives you a glass or TV like appearance but also brings no noticeable half gain. This screen can also be viewed at any direction or angle. With large sizes up to 84"x112" it can also be tiled to make larger displays

The Definition Pro screen line can be used in standard projection systems or systems that require short throw lenses and mirror rigs or the new short throw projectors with built in mirrors.

Definition Pro can also be built into curved screen designs and displays.
