

Definition™ REAR PROJECTION SCREEN

The Definition rear projection screen is a dark grey screen and is made at 3mm thick. Definition adds contrast to your images while combating ambient light and maintaining image quality.

At 3mm thick Definition can be hung frameless with light wire and side clips, framed and hung or easily built into installs.

This rear projection screen comes in sizes up to 80"x120" and can be tiled to make larger displays

Definition can also be formed, shaped or molded into custom shapes without losing its properties or characteristics, as it is not made with topical coatings, films or layers making it durable, effective and waterproof.

Building Definition into curved displays and designs is simple even with dramatic curves and designs Definition will hold focus without the use of warping software and hardware.
