

Reflection™ FRONT PROJECTION SCREEN

Step out of the world of fabric, vinyl, plastic and painted walls and into the next generation solution to front projection systems. The difference is a maximum durability, greater visibility, higher quality and versatility that the others can't touch.

With its solid core construction, Reflection™ can be used in a variety of environments – even outdoors.

The Reflection™ screen works effectively with interactive white board pens for education or business applications and can be easily wiped down with water.
